SUMMARY

Frontend developer with 5+ years in web development, 3+ of them in product teams. As Frontend Lead at Tischerco, I built the web client of a B2B platform from scratch: 30+ screens in React, TypeScript and Redux Toolkit. Since April 2026 I've been building dashboards and backend features for an AI video-analytics startup. I use AI coding agents (Claude Code) daily and check their output with tests and code review.

SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, Redux Toolkit, TanStack Query, Zustand, React Hook Form, Zod, Vite
UI: Ant Design, Tailwind CSS, SCSS, responsive layout, i18n (i18next, next-intl)
APIs & backend: REST, WebSocket, JWT, Node.js, PostgreSQL, Redis; Go (working knowledge)
Quality & tools: Vitest, Playwright, ESLint, Prettier, Git, GitHub Actions, Docker, Linux, Claude Code

EXPERIENCE

Polyframe AI — **Apr 2026 – Present**
Fullstack Engineer · AI video analytics for retail and offices (startup) · Tashkent

- Develop features for the React/TypeScript dashboard (TanStack Query, Zustand, Tailwind CSS): live zone occupancy, staff attendance, alerts and reports.
- Built a camera zone editor (drag handles, undo, snapping), an entrance-line editor and a system status page.
- Made the dashboard and the alert engine use one shared headcount, so both always show the same number; the live view query went from seconds to milliseconds.
- Fixed metric bugs, covered metric queries with regression tests and replaced misleading zeros with “no data” states.
- Backend features in Go (PostgreSQL, MQTT, WebSocket): Telegram alerts with rate limiting and retries, scheduled PDF reports, a server health watchdog.

Tischerco (Germany) — “It's Done” platform — **Apr 2024 – Dec 2025**
Frontend Lead · B2B platform for service companies · remote

- Built the web client from scratch on React, TypeScript, Vite, Redux Toolkit and Ant Design; owned its architecture and standards.
- Delivered the core flows: companies and sites, work reports with photos and e-signatures, invoices and offers generated from reports (with VAT), PDF preview.
- Integrated the Java Spring REST API: JWT with refresh tokens, role-based screens for admins, managers and employees.
- Built complex forms (React Hook Form + Yup, input masks, Google Maps address autocomplete) and localized the app into German, English and Russian.
- Kept long lists fast (infinite scroll, memoization); planned work with backend, design and QA in a 6-person Scrum team.

vakhid.digital — **Feb 2023 – Mar 2024**
Frontend Developer · web studio with an in-house logistics CRM · Tashkent

- Developed and maintained modules of the in-house freight logistics CRM (React, TypeScript, Redux Toolkit, REST API).
- Moved existing JavaScript modules to TypeScript, so type errors were caught at build time instead of by users.
- Built and supported client websites: corporate sites and landing pages, responsive and cross-browser.

Freelance — **Apr 2020 – Nov 2022**
Web Developer

- Built 50+ websites and web apps for businesses: online stores, landing pages, corporate sites, admin panels (React, Next.js, Node.js/NestJS, PHP, WordPress).
- Took backend tasks too: JWT/Passport auth, role-based endpoint protection, file uploads, Telegram bots.

PROJECTS

Taom — food price comparison for Tashkent (own product, pre-launch) — **Apr 2026 – Present**

- Telegram bot with a Mini App and a Next.js 15 / React 19 web app that compare dish prices and delivery fees across delivery services; Russian, Uzbek and English UI.
- TypeScript monorepo: PostgreSQL, Redis + BullMQ workers, LLM features via OpenRouter, 1,900+ unit tests (Vitest), Playwright, CI with Semgrep and gitleaks, Docker.

EDUCATION & LANGUAGES

Bachelor of Applied Informatics — Russian-Tajik (Slavonic) University, Dushanbe · 2021
Languages: Russian — fluent · English — B2 · Tajik — native · Persian — fluent · Uzbek — basic
