SUMMARY

Fullstack developer with 5+ years in web development, 3+ of them in product teams. React and Next.js on the frontend, Node.js and Go on the backend, PostgreSQL, Redis, Docker. At Polyframe AI I build the Go backend and web UI of a video-analytics system, and I am building my own TypeScript product solo. Previously Frontend Lead at Tischerco (Germany) and, for 2.5 years, head of my own web development team, HM-TECH.

SKILLS

Languages: TypeScript, JavaScript, Go, SQL
Frontend: React, Next.js, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, Ant Design
Backend: Node.js, NestJS, Go (Gin), REST APIs, WebSocket, MQTT, Telegram Bot API
Databases & queues: PostgreSQL, Redis, BullMQ, MongoDB
Testing & infrastructure: Vitest, Playwright, Testcontainers, Docker, GitHub Actions (CI/CD), Linux
Practices: code review, Scrum, AI-assisted development

EXPERIENCE

Polyframe AI — **Apr 2026 – Present**
Fullstack Engineer · AI video analytics for retail and offices · Tashkent

- Build the Go backend (Gin, pgx, PostgreSQL, MQTT, WebSocket) and the React/TypeScript web UI: zone occupancy, staff attendance, alerts, reports.
- Fixed a mismatch between the live screen and alerts (10 vs 13 people at the same moment) by removing a duplicate SQL calculation and moving the screen to the shared data source; query time fell from 2.2 s to ~10 ms (measured on the test stand).
- Took part in an audit of 225 analytics blocks and fixed metric bugs, including visitor counts inflated several-fold; added integration tests on PostgreSQL (Testcontainers) that keep the bugs from coming back.
- Made Telegram alert delivery reliable: global and per-chat rate limits, retries honoring retry_after, cleanup of dead channels; scheduled PDF reports (Gotenberg).
- Wrote a health watchdog and a disk-space guard (systemd, Bash) for on-premise servers after a full disk stopped a server from booting.

Tischerco (Germany) — “It's Done” platform — **Apr 2024 – Dec 2025**
Frontend Lead Developer · B2B platform for service companies · remote

- Built a 30+ screen web app from scratch (React, TypeScript, Redux Toolkit, Ant Design) and owned its architecture.
- Integrated the Java Spring REST API and agreed API contracts with the backend: JWT (access/refresh), role-based access, subscription plans.
- Work reports with photos and e-signatures, invoices with VAT, PDF preview, Google Maps address search.

vakhid.digital — **Feb 2023 – Mar 2024**
Frontend Developer · web studio with an in-house logistics CRM · Tashkent

- Developed modules of the freight logistics CRM (React, Redux Toolkit, REST API) and migrated them from JavaScript to TypeScript.

HM-TECH — own web development team — **Apr 2020 – Nov 2022**
Founder & Team Lead · up to 14 people: frontend, backend, design, QA, SEO

- Built and led the team: staffing projects, estimates and specs, task planning, deadlines, code review, client communication.
- Delivered 50+ projects: online stores, corporate websites, landing pages, admin panels (React, Next.js, NestJS, PHP, WordPress).
- Wrote frontend and Node.js/NestJS backend myself: JWT/Passport auth, role-based access, file uploads, Telegram bots.

PROJECTS

Taom — food delivery price comparison (own product, pre-launch) — **Apr 2026 – Present**

- Designed and build solo a Telegram bot with a Mini App, a Next.js 15 / React 19 web app and background workers in one TypeScript monorepo.
- Price collection: Redis + BullMQ job queue with retries, dead-lettering and a circuit breaker; Zod validation; PostgreSQL with raw SQL and 60+ migrations.
- Performance and quality: home page p95 under ingest load cut from 109 s to 1.5 s (local load test); 1,900+ unit tests, Playwright e2e, CI with SAST (Semgrep).

EDUCATION & LANGUAGES

Bachelor of Applied Informatics — Russian-Tajik (Slavonic) University, Dushanbe · 2021
Languages: Russian — fluent · English — B2 · Tajik — native · Persian — fluent · Uzbek — basic
