SUMMARY

Frontend developer with 5+ years in web development, 3+ of them in product teams. As Frontend Lead at Tischerco (Germany), I built a B2B platform's web app from scratch: 30+ screens on React, TypeScript and Redux Toolkit. At Polyframe AI I work on the web UI and the Go backend of a video-analytics system. Before that, I ran my own web development team, HM-TECH, for 2.5 years.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, SQL, HTML5, CSS3
Frontend: React, Next.js, Redux Toolkit, TanStack Query, Zustand, React Hook Form, Vite, Tailwind CSS, Ant Design, SCSS
Backend & data: Node.js, NestJS, REST APIs, WebSocket, PostgreSQL, Redis
Testing & infrastructure: Vitest, Playwright, Docker, GitHub Actions (CI/CD), Linux
Practices: code review, Scrum, AI-assisted development

EXPERIENCE

Polyframe AI — **Apr 2026 – Present**
Fullstack Engineer · AI video analytics for retail and offices · Tashkent

- Develop the web UI on React 19, TypeScript, TanStack Query, Zustand and Tailwind: live zone occupancy, staff attendance, alerts and reports.
- Built a zone editor on top of the camera frame (draggable polygon vertices, undo, snapping), an entrance-line editor and playback of annotated video clips (HLS).
- Fixed a mismatch between the live screen and alerts (10 vs 13 people at the same moment) by removing a duplicate SQL calculation and moving the screen to the shared data source; query time fell from 2.2 s to ~10 ms (measured on the test stand).
- Took part in an audit of 225 analytics blocks and fixed metric bugs, including visitor counts inflated several-fold by counting tracks instead of people in frame; locked the fixes in with integration tests (Testcontainers).
- In Go (Gin, pgx): Telegram alerts that respect API rate limits and retry on failure, scheduled PDF reports, server health monitoring.

Tischerco (Germany) — “It's Done” platform — **Apr 2024 – Dec 2025**
Frontend Lead Developer · B2B platform for service companies · remote

- Built a 30+ screen web app from scratch (React, TypeScript, Vite, Redux Toolkit, Ant Design); owned its architecture and code quality.
- Delivered the core flows: companies and sites, work reports with photos and e-signatures, invoices and quotes with VAT, PDF preview.
- Integrated the Java Spring REST API: JWT (access/refresh), role-based access for admins, managers and employees, subscription plans.
- Complex forms on React Hook Form + Yup with input masks, Google Maps address search, localization into German, English and Russian (i18next).
- Optimized rendering of long lists (infinite scroll, memoization); worked in a 6-person Scrum team with backend, design and QA.

vakhid.digital — **Feb 2023 – Mar 2024**
Frontend Developer · web studio with an in-house logistics CRM · Tashkent

- Developed and maintained modules of the in-house freight logistics CRM (React, TypeScript, Redux Toolkit, REST API).
- Migrated JavaScript modules to TypeScript, so type errors were caught at build time instead of in production.
- Built responsive, cross-browser corporate websites and landing pages for studio clients.

HM-TECH — own web development team — **Apr 2020 – Nov 2022**
Founder & Team Lead · up to 14 people: frontend, backend, design, QA, SEO

- Built and led a distributed team: staffing projects, assigning tasks, tracking deadlines, reviewing code.
- Ran projects from the first call to handover: requirements and specs, time and cost estimates, client communication.
- Delivered 50+ projects: online stores, corporate websites, landing pages, admin panels (React, Next.js, Node.js/NestJS, PHP, WordPress).
- Owned the frontend architecture and wrote the hardest parts myself: React SPAs, JWT/Passport auth, role-based access, Telegram bots.

PROJECTS

Taom — food delivery price comparison (own product, pre-launch) — **Apr 2026 – Present**

- Telegram bot with a Mini App and a Next.js 15 / React 19 web app that shows where the same dish is cheaper, delivery included; Russian, Uzbek and English UI.
- TypeScript monorepo: PostgreSQL, Redis + BullMQ background workers, LLM features via OpenRouter; 1,900+ unit tests (Vitest), Playwright e2e, GitHub Actions CI with SAST (Semgrep).

EDUCATION & LANGUAGES

Bachelor of Applied Informatics — Russian-Tajik (Slavonic) University, Dushanbe · 2021
Languages: Russian — fluent · English — B2 · Tajik — native · Persian — fluent · Uzbek — basic
